

Worksheet: Types of structures

The first column of the table gives an example of a structure. Classify each structure. First, work out if it is a natural or human-made structure. Then, decide if it is a shell, frame or solid structure. Place a tick in the correct columns.

Structure	Natural	Human-made	Frame	Shell	Solid
A washing line 					
A kennel 					
A crane 					
An igloo 					
A concrete wall 					

This page can be photocopied

Structure	Natural	Human-made	Frame	Shell	Solid
A cave 					
A rondavel 					
A rock 					
A chair 					
A Zulu pot 					

This page can be photocopied

Worksheet: Advantages and disadvantages of telephone systems

Read through the information on evaluating telephone systems. The following table compares landline phones to cell phones. Complete the table by writing a sentence in each block.

Concerns	Cell phones		Landline phones	
	Advantages	Disadvantages	Advantages	Disadvantages
Availability and access (How easy is it to make or receive a phone call?)				
Features and applications (What can the phone do for you other than make and receive calls?)				
Cost (How expensive is the phone; what do phone calls cost?)				
Safety (How safe is the phone for your health; can it help you in an emergency?)				
Reliability (Is the phone always available to use; are there times when you cannot make a call?)
